

PLASTER POWER SPONGE & FLOAT

Plaster Power Sponge Float

- for finishing large areas of plaster
- floating & scratching render
- sponge & float up to 60 sq metres per hour
- range of sponges & plastic floats
- with pumped water feed & speed control

The input voltage is 110 volt and it reduces to 48 volt at the power tool

A float disc and set of sponges are included with the machine

The plaster power sponge uses a low voltage slow speed power float and water feed pump to sponge or float finish large areas of spray or trowel applied plaster or render

It works effectively on one coat and projection plaster, hardwall and following on behind a plaster spray pump

A steel trowel and a nail float for scraping and scratching back render are also available

PLASTER POWER SPONGE 0.5kw

Speed 90-140rpm

Tool weight 4kg

Disc 40cm

Prep rate 100m/hr

Vibration level 1.9m/s

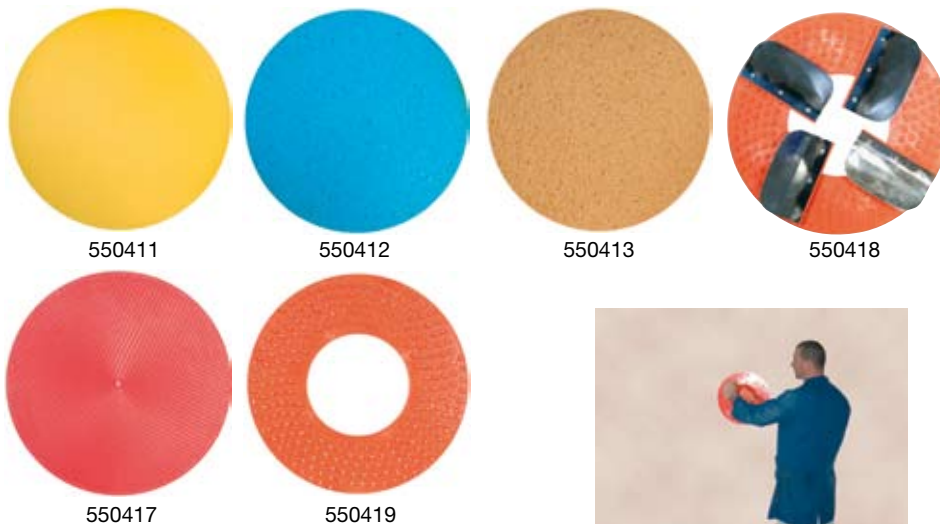

Noise level 76dBA

Voltage 110v or 240v

Transformer 5kva, 32 amp plug

APPLICATIONS

power sponging wet plaster	✓
finishing large areas	✓
finishing alongside plaster pumps	✓
trowelling up render	✓
scrapping back render	✓
