

DRYWALL & BOARD HANDLING TOOLS

BOARD & DOOR POSITIONER TOOL

- simple tool for positioning doors & boards
- adjusts angle of board
- nudge board into place with foot

The door positioning tool is a simple device for nudging a door or board into position before fixing

Adjust the angle of the board using the plastic slider and tap the base of the board into position

The board levers will ease a door or board upwards

The board carrying tool allows easier handling of plaster boards
