

COVE & EDGING TROWELS

COVE & EDGING TROWELS

- stainless steel corner & cove trowels
- range of radius sizes
- for use on epoxy screed coves
- gutters & grooves in concrete
- edging slabs & stairs

These corner, cove and edging trowels are all produced in stainless steel and have traditional wooden handles

The cove trowels are for producing smooth corners particularly in hygienic environments; the mitred corner cove trowels are for making consistent corner coves

Bull nosed arris trowels produce an even rounded edge to cement and concrete slabs

The groovers will make slots or safety recesses in steps and concrete
