

KNEE PADS & SPIKED SHOES

POLYURETHANE KNEE PADS

- extra protection of knee joint against nails
- orange knee pads are CE marked
- conform to EU health & safety requirements
- with heavy duty durable rubber outers
- ergo straps minimize restriction of circulation
- comfortable design

The orange knee pads are produced to the latest European standards that require protection against nails penetrating the knee pad

The newly designed straps prevent restriction of the circulation at the back of the knee and conforming to latest standards

The orange knee pads are durable and comfortable to wear and have a thick water resistant cellular polyurethane structure

The flexi-top knee pads are recommended for working in wet or gritty environments

The gel inserts give extra protection and comfort to the lower part of the knee joint

The spiked overshoes are produced for walking over self-levelling floor toppings, epoxy coatings and pumped screeds. They have a plastic base with 25 or 40mm spikes

They are fitted with adjustable webbed straps adjustable strap size and will fit shoe sizes 7-11
