

RENDERING TOOLS

RENDERING & BACKING COAT TOOLS

- for keying & scraping renders
- scoring backing coats
- reducing & cleaning surfaces & corners

The scarifiers are for giving renders a scraped or dragged finish

The toothed scratchers have stainless steel prongs that will score undercoat and backing plasters

The angle plane is for reducing high spots and plaster wall surfaces, cleaning angles and up to beads

The lattice plane is used in a floating action and is for levelling and opening the surface of monocouche renders

STAINLESS STEEL RENDER SPATULAS

- stainless steel flexible blade
- for levelling & smoothing
- closing off & finishing
- external spray renders
- leaves knocked down appearance

The spatulas are produced with a flexible stainless steel blade with aluminium frame and are for knocking back textured topcoat renders to leave a flattened finish

The stainless steel harling trowels are for throwing spar dash and pebble dash onto newly applied sand and cement renders

The serrated spatula is for scraping back monocouche renders

ABRASIVE TOOLS FOR RENDER, AAC & EIFS

ABRASIVE TOOLS

- large sized hand rasps
- for keying back aircrete blocks
- external insulation
- tungsten rasp is hard wearing

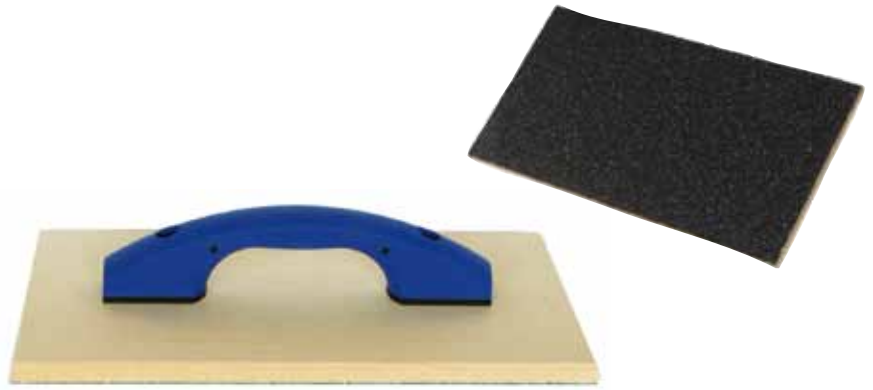

The rasps are produced with either coarse silicone carbide paper or tungsten chip sheet

The tungsten rasp can be brushed clean and is durable in use

The range of tools are for use with the new generation of lightweight aircrete blocks, autoclaved aerated concrete (AAC) as well as external insulation and finishing systems (EIFS)

The system uses thin bed cement adhesive instead of the traditional brick mortar

The toothed rasp will key and reduce blocks and cement adhesives

ALUMINIUM RULES

ALUMINIUM EXTERNAL WALL TOOLS

- range of aluminium rules & straight edges
- for keying back & opening the surface
- use on external colour through renders

The serrated feather edge is a lightweight tool for working the surface of newly applied external renders

The toothed edge works on the surface to leave an open texture

The aluminium H profile rule is an alternative to the serrated feather edge

PLASTIC TROWELS

PLASTIC TROWELS

- plastic faced trowels
- for white cements & renders
- non marking on epoxies
- special finishes on render

Plastic trowels are used mainly to avoid surface discolouration and blade transference from steel trowels

They are also used to achieve special finishes with external renders, the plastic blade gives a different finish to steel trowelling

The trowel with alloy shank is supplied with flexible clear blade for white cements or stiffer grey blade for epoxies

The trowel with orange plastic handle has a nylon blade that is solvent resistant and can be used on decorative finishes and epoxy quartz

The range of trowels with black soft handles are for external render finishes and interior decorative coatings

Other plastic trowel blades are available for differing surface finishes

MORTAR POINTING & SEALANT GUNS

MORTAR & GROUT GUNS

- easy to use barrel guns
- for applying brick & mortar joints
- injecting cements & applying tile grouts

The guns are simple to use for mortar pointing

The skeleton type frame with trigger mechanism applies an even consistent mortar bead. The plastic barrels and nozzles are replaceable and easy to clean

The gun should be used with pre-bagged pointing materials or well mixed and plasticised mortars made with soft or river bed sand
