

PLASTER POWER SPONGE & FLOAT

PLASTER & RENDER POWER FLOAT

- for finishing large areas of plaster & render
- finishing alongside plaster pumps
- sponging up large areas
- float up to 60 sq metres per hour
- range of sponges & plastic floats

The EPG400 is a hand held rotary power float and sponge for finishing topcoat plasters and renders. A float disc and sponge are included with the machine.

The plaster power sponge uses a slow speed power float to sponge or float finish large areas of spray or trowel applied plaster or render.

It works effectively on one coat and projection plaster, hardwall and following on behind a plaster spray pump.

APPLICATIONS

- floating & sponging up
- power finishing wet plaster
- trowelling up render
- scraping back render

PLASTER POWER SPONGE 500w

Speed 60rpm

Tool weight 3.5kg

Disc 40cm

Finish rate 50m/hr

Vibration level 1.9m/s

Noise level 76dBA

Voltage 110v or 230v

Transformer 3kva, 16 amp plug

RENDER FINISHING ACCESSORIES

POWER FLOAT ACCESSORIES

- for finishing large areas of render
- abrading insulation
- floating render & cements
- trowelling up
- scratching back topcoats

The EPG400 rotary power float and sponge has a range of accessories and discs for finishing topcoats and renders

A float disc and sponge are included with the machine

The coarse silicone carbide disc with velcro backing is for keying back insulation boards and sanding exterior coatings

The float disc is for hardwall plasters

The steel trowel is for trowelling up exterior renders and the nail float is for scraping and scratching back render

APPLICATIONS

- floating & sponging up
- power finishing wet plaster
- trowelling up render
- scraping back render

PLASTER WATER FEED POWER SPONGE

PLASTER POWER SPONGE FLOAT

- for finishing large areas of plaster
- finishing alongside plaster pumps
- sponging up large areas
- float up to 60 sq metres per hour
- range of sponges & plastic floats
- with pumped water feed & speed control

The input voltage is 110 volt and it reduces to 48 volts at the power tool

A float disc and set of sponges are included with the machine

The plaster power sponge uses a low voltage slow speed power float and water feed pump to sponge or float finish large areas of spray or trowel applied plaster or render

It works effectively on one coat and projection plaster, hardwall and following on behind a plaster spray pump

A steel trowel and a nail float for scraping and scratching back render are also available

APPLICATIONS

- floating & sponging up
- power finishing wet plaster
- trowelling up render
- scraping back render

PLASTER POWER SPONGE 0.5kw

Speed 90-140rpm

Tool weight 4kg

Disc 40cm

Prep rate 100m/hr
